6600-5

## 10A/15A Outlet with integrated Light Pipes

Assembly of Power Distribution Units – Quick and Easy

Growing PDU Market in Data Center, IT & Telecom Applications

> Fast-growing data volumes due to popularity of YouTube, Facebook, Google (videos, music) and the increase of commercial data

> High and sensitive data requires quick and preventive maintenance on site

> Benefits of integrated light pipes for status indication:

> > Eliminates separate mounting of light pipes or LEDs in the PDU enclosure

> > Accurate light pipe position over the LED, no adapter required

SCHURTER
ELECTRONIC COMPONENTS

2 Light Pipes

1 Light Pipe

> Appliance outlet 10 A / 15 A, Type F

> Ideal outlet for smart PDU application

> Factory mounted light pipes for status indication:
  - 2 light pipes, 1 light pipe right or left side or without
    light pipe

> Eliminates additional mounting of light pipes or LEDs in the
  PDU enclosure

> Accurate light pipe position over the LED, no adapter required

> Offered with top latch V-Lock cord retention and other side
  latch mechanism

> PCB terminals

> Snap-in mounting

> For panel thickness 1.7 and 2.0 mm (others on request)

> Approvals: VDE, CCC   16 A @ 250 VAC
              UL, CSA   20 A @ 250 VAC

V-Lock

RoHS COMPLIANT

Halogen Free HF

Strategic Positioning

> Expanding our product portfolio for PDU applications

> Participation with smart and unique products in a growing market

> Competitive price / performance

> Product for distribution units (high volume business)

Competitors

> No equivalent product on the market

Price Position

> Very attractive prices for such a full assembled combination

Applications

> Power distribution units for international use

> Smart or metered PDUs applied in Data Center, IT and telecom cabinets

USP (Customer focus)

> Significantly reduces labor costs because of less mounting efforts in the PDU enclosure and on the LED

> V-Lock cord retaining mechanism is standard

> Also accepts cord retaining for side latching cord sets
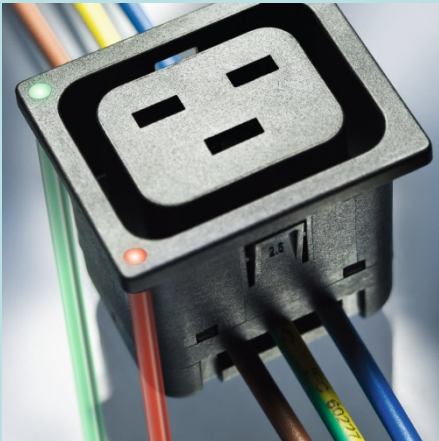

Smart and metered Power Distribution Units (PDU)

6600-5 – Ordering Information

Panel thickness [mm]	Terminals	Light pipe N side	Light pipe L side	Order Number
1.7	PCB terminals	●	●	3-100-403

ELECTRONIC COMPONENTS

IEC Outlets: with solder, quick connect or PCB terminals: **6600 and 4797**

with IDC terminals for efficient wiring: **6610 and 4710**

Light Pipe available 6600-5, 4797, 6610, 4710

> Integrated fiberglass light pipe
> Operational or functional status indication
> Channels light from LEDs on the PCB to the front of the connector
> Ref Light Pipe Application Note

Mating V-Lock cordsets

> Interconnection cords 10A/16A
> Cable lengths 0.6 up to 3.0 meters
> Offering cord retaining on PDU side and appliance side
